

OpenAI Feature Request Template

OpenAI Feature Request Template

Feature Request Number: OAI-FR-YYYY-NNN
Feature Request Title: [Short, precise title in English]
Product / Area: [ChatGPT Web, ChatGPT Projects, ChatGPT Mobile, ChatGPT Voice, Codex, API, Memory, Files, Connectors, UI/UX, Account, Settings, Other]
Status: Draft
Priority: [Low / Medium / High / Critical]
Creation Date: YYYY-MM-DD
Last Updated: YYYY-MM-DD
Template Version: 1.0.0

Requester

Name: Bruno Delnoz
Role: Senior Middleware Integration & Digital Migration Consultant
Location: Rochefort, Namur - Belgium
Main Phone: +32 456 88 24 57
Secondary Phone: +32 475 38 11 44 - WhatsApp only
Email: bruno.delnoz@protonmail.com
GitHub: <https://github.com/bdelnoz> - 36 public repositories and 77 private repositories, as provided by requester
GitHub Portfolio: <https://bdelnoz.github.io/>
LinkedIn: <https://www.linkedin.com/in/bdelnoz>

1. Executive Summary

[Write a short, direct summary of the requested feature in 3 to 6 lines. Explain what should be added or changed, where it should appear, and why it matters.]

2. Feature Request

[Describe the requested feature clearly and completely. Use product-neutral language where possible. Avoid emotional wording. Keep the request actionable for product, design, and engineering teams.]

The requested change is:

- [Core capability 1]
 - [Core capability 2]
 - [Core capability 3]
-

3. Problem

[Explain the current user problem. Be specific. Describe the friction, missing workflow, ambiguity, repeated manual work, wasted time, accessibility issue, privacy issue, or reliability issue.]

Current limitations:

- [Current limitation 1]
 - [Current limitation 2]
 - [Current limitation 3]
-

4. Current Workflow

[Describe how users must handle the situation today without the requested feature.]

Current workaround:

1. [Step 1]
2. [Step 2]
3. [Step 3]

Why this workaround is insufficient:

- [Reason 1]
 - [Reason 2]
 - [Reason 3]
-

5. Expected Behavior

[Describe the expected product behavior after the feature is implemented. This section should be clear enough to become an implementation brief.]

Expected behavior:

- [Expected behavior 1]
 - [Expected behavior 2]
 - [Expected behavior 3]
-

6. Proposed UX / Product Behavior

[Describe where the feature should appear in the interface, what controls or options should exist, and how the user should interact with it.]

Suggested behavior:

- **Entry point:** [Menu, button, project settings, chat menu, account settings, sidebar, composer, etc.]
 - **Main action:** [What the user clicks, selects, uploads, enables, disables, exports, pins, moves, etc.]
 - **Confirmation / Feedback:** [What the UI should display after success or failure]
 - **Persistence:** [Whether the setting or result should persist across sessions, devices, projects, or chats]
-

7. User Impact

[Explain who benefits and how. Mention advanced users, professional users, accessibility users, multilingual users, developers, researchers, project-heavy users, or privacy-conscious users when relevant.]

Impact:

- [Impact 1]
 - [Impact 2]
 - [Impact 3]
-

8. Acceptance Criteria

The feature can be considered implemented when:

- ☐ [Acceptance criterion 1]
 - ☐ [Acceptance criterion 2]
 - ☐ [Acceptance criterion 3]
 - ☐ [Acceptance criterion 4]
 - ☐ [Acceptance criterion 5]
-

9. Edge Cases and Constraints

[List relevant edge cases. Keep this practical and testable.]

Potential edge cases:

- [Edge case 1]
- [Edge case 2]
- [Edge case 3]

Constraints:

- [Constraint 1]
 - [Constraint 2]
 - [Constraint 3]
-

10. Privacy, Security, and Safety Considerations

[Describe privacy, security, account, workspace, or data-retention implications. State when the feature must avoid exposing private chat content, uploaded files, account metadata, or personal data.]

Considerations:

- [Privacy/security consideration 1]
 - [Privacy/security consideration 2]
 - [Privacy/security consideration 3]
-

11. Compatibility and Scope

Platforms: [Web / Desktop browser / iOS / Android / API / Codex / Other]

Account scopes: [Free / Go / Plus / Pro / Team / Enterprise / All accounts]

Project scope: [Global account / Project-level / Chat-level / Workspace-level / Organization-level]

In scope:

- [In-scope item 1]
- [In-scope item 2]

Out of scope:

- [Out-of-scope item 1]
 - [Out-of-scope item 2]
-

12. Example Scenario

[Describe one concrete scenario showing the problem and the expected improvement.]

Example:

1. [User action or situation]
 2. [Current problem]
 3. [New behavior after implementation]
 4. [Resulting benefit]
-

13. Evidence / Source Notes from Original Chat

[Summarize the relevant facts from the original chat. Keep only useful context. Do not include private chat content unless it is required to understand the request.]

Relevant notes:

- [Note 1]
 - [Note 2]
 - [Note 3]
-

14. Suggested Internal Labels

Suggested labels for triage:

- [Feature area label]
 - [UX label]
 - [Workflow label]
 - [Accessibility / Privacy / Productivity / Developer tooling label if relevant]
-

15. Submission Checklist

Before sending this feature request:

- ☐ The feature request number is unique.
 - ☐ The title is short and clear.
 - ☐ The problem is concrete.
 - ☐ The expected behavior is actionable.
 - ☐ The acceptance criteria are testable.
 - ☐ The requester contact details are correct.
 - ☐ The Markdown and PDF versions contain the same content.
 - ☐ No unrelated brainstorming remains in the final version.
 - ☐ Sensitive personal or third-party data has been removed unless strictly necessary.
-

16. Changelog

Version	Date	Change
1.0.0	2026-05-12	Initial reusable OpenAI feature request template.
